

I. Overview

1. Screen Flow

2. Database Scheme

3. Implementing Priorities

Priority	Screens (Prioritize from left to right)
#1	Home, User Register, User Login, Dashboard, Setting List, Setting Details
#2	Reset Password, User Profile, User List, User Details, Web Contacts, Contact Info
#3	Change Password, Product List, Product Details, Public Products, Product Info, Post List, Post Details, Blog List, Blog Details, Authorization (Admin, Mkt, User)

The layouts for some of the screens are defined in the Screen Layouts part below. Students to define the layouts for missing screens as well as the functionalities of all the screens.

II. Screen Layouts

1. Web Screens

1.1 Home Page

Create a blank Home Page screen: with web footer integrated (this web footer would be developed as the scope of the Dashboard screen); the web header shown differently as below. The web header would be shown in all the pages.

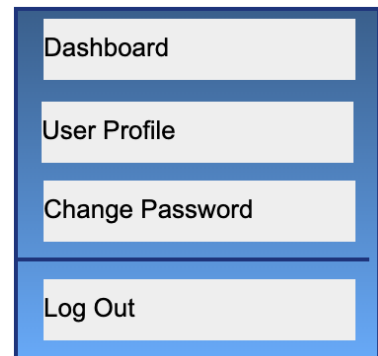

(i) When user has not logged in (shown in the Web screens)

(2i) When user has logged in (shown in the Web screens)

(3i) When user has logged in (shown in the Admin screens)

In case the user hovers the avatar, below context menu would be shown, from there allow the user to access the relevant screens or to logout. After logging out, the user would be directed to the Home Page

1.2 User Login
